

WHAT EXACTLY
CAN THE
WORLD'S MOST
POWERFUL
AND
EXPANDABLE
PC DO?

ANYTHING
IT WANTS.

Now it's possible to do just about anything you can think of, faster than you can think.

Introducing the COMPAQ DESKPRO 386/33 Personal Computer. Never before has so much performance, expandability and storage been put into one desktop PC. And never before has one PC been capable of so much.

Inside its new system unit, you'll find that our engineers have redesigned just about every component to deliver a minicomputer level of power with unmatched PC flexibility.

A total of eight expansion slots let you customize the system to your needs by expanding memory and choosing from thousands of industry-standard expansion boards.

So you can use it as a stand-alone PC, putting its power to work on the most demanding CAD/CAE, financial analysis, database management and other personal productivity applications.

Or you can spread the power around, using the COMPAQ DESKPRO 386/33 as the driving force for a network or multiuser system. At the heart of the system is the Intel 386™ microprocessor. Running at a blazing 33 MHz, it works in concert with a series of technological advancements. Like a 33-MHz cache memory controller with 64K of high-speed static RAM. Interleaved memory architecture. And the exclusive COMPAQ Flexible Advanced Systems Architecture.

This high-performance combination delivers a 35% performance improvement in

CPU-intensive applications over 25-MHz 386 cache-based PC's.

Or said another way, nothing will slow you down. No matter what you want to do.

You can expand the 2 MB of standard RAM up to 16 MB using the high-speed 32-bit slot. That leaves up to six industry-standard slots free to customize the system to the demands of

the application you're using.

If your job is particularly demanding, you can use up to five high-performance internal storage devices to hold up to 1.3 gigabytes of data. And if that's not enough, bring

total system storage to 2.6 gigabytes with the optional COMPAQ Fixed Disk Expansion Unit.

There's more. You can run MS-DOS®, MS® OS/2, Microsoft® Windows/386 and the XENIX® and UNIX® operating systems. Access memory over 640K under DOS with the COMPAQ Expanded Memory Manager that supports Lotus/Intel®/Microsoft (LIM) 4.0. And speed through calculations with 33-MHz Intel 387™ and Weitek 3167 coprocessor options.

All the new advancements engineered into the COMPAQ DESKPRO 386/33 deliver an unmatched level of power, expandability and storage.

To do anything you want.

INTRODUCING THE COMPAQ DESKPRO 386/33

Built-in interfaces make it easy to connect pointing devices, printers, plotters or other peripherals without using an expansion slot.

So you can use it as a stand-alone PC, putting its power to work on the most demanding CAD/CAE, financial analysis, database management and other personal productivity applications.

Or you can spread

High-speed VGA graphics are built in. And for greater graphics capabilities, add the optional COMPAQ Advanced Graphics 1024 Board.

IN 386 PERSONAL COMPUTING, YOU'RE LOOKING AT THE MOST WANTED LIST.

In 1986, Compaq introduced the world to personal computers based on the 386 microprocessor.

Since then, we've made it possible for every level of user to work with this powerful technology. In fact, more people work with COMPAQ 386-based PC's than any other 386's worldwide.

Today, Compaq offers the broadest line of these high-performance personal computers. Each delivers significant technological advancements developed by Compaq engineers. Each delivers optimum performance for the needs of different users. And each is built to the highest standards for compatibility and reliability.

For power-hungry users who want 386 performance to go, the COMPAQ PORTABLE 386 Personal Computer does things normally reserved for a desktop 386 PC. Without compromise.

For people considering 286 desktops, the COMPAQ DESKPRO 386s Personal Computer is an affordable way to move up to 386 performance. And if you have a 286 that you've outgrown, the COMPAQ DESKPRO 386/20e Personal Computer

is an easy step up to the power and capabilities of a 20-MHz 386 machine.

For the increasing needs of today's 386 users, the COMPAQ DESKPRO 386/25 Personal Computer offers advanced performance. And for those who desire the most power and expandability available in a desktop PC, the COMPAQ DESKPRO 386/33 stands alone.

For a free brochure on COMPAQ 386-based personal computers and the location of your nearest Authorized COMPAQ Computer Dealer, call 1-800-231-0900, Operator 93. In Canada, 1-800-263-5868, Operator 93.
