

# Exidy 80/2 Word Processing System

Heretofore, word processing equipment has been affordable almost exclusively for the larger business firms, by virtue of cost and special training required to operate the system.

Exidy, the price/performance leader in microcomputer and disk based systems, introduces the cost effective 80/2 Word Processing System with the following features:

- 63-key typewriter-style keyboard with 16-key numeric keypad;
- Industrial grade 12" CRT with non-glare screen;
- 128 upper/lower case characters; 128 user-defined graphic symbols;
- 2 disk drives with 616,000 formatted bytes of data storage;
- 132-column, daisy wheel printer with 96-character print wheel;
- Text editing and formatting system for small/large business applications;
- Automatic text wrap around with SEARCH and REPLACE commands;
- One-key commands: end-to-end cursor line SCAN, TAB, INDENT, soft-HYPHEN, and four-direction cursor control;
- Output formatting: dynamic print control, indentation, right justification, proportional letterspacing, and boldface printing;
- High level User Defined Commands for such repetitive tasks as mail merge letter typing, multiple column printing, and multiple forms entry.

The Exidy 80/2 Word Processing System is cost effective, easy to use with no special operator training required, and also has business applications capabilities, optional.
