1989 Edition

Twenty-sixth edition - obsoletes prior editions

References to IBM offerings do not imply that they are available in all countries in which IBM operates. The prices are shown in dollars and apply in the United States.

Address comments to IBM Software Directory 04-02-40, 5 West Kirkwood Boulevard, Roanoke, Texas 76299-0001, or use the Reader Comment Card in the back. IBMers may also correspond worldwide on VNET (PROFS) to IBMSOFT at DALHQIC2. IBM may use or distribute information you supply without incurring obligation. You may, of course, continue to use the information supplied. Distribution and listing of programs is at the sole discretion of IBM, without charge to the author. Prices and other program characteristics are subject to change and are presented here for your information. They are subject to confirmation at the time the license commences.

Introduction

This twenty-sixth edition of the Software Directory has been revised to make product information easier to find. The revised format presents product information in a clear and concise manner and will allow for additional product information in future editions.

This edition of the Software Directory was created using the capabilities of the IBM Publishing Systems BookMaster, BrowseMaster, and ProcessMaster products. What you see is a direct result of BookMaster.

Contents

Section 1. Personal Computer	1-1
Section 2. Cooperative Software	2-1
Cooperative Software (Terms and Conditions)	2-3
Section 3. Keyword	3-1
Section 4. Software Clusters	4-1
Alphabetic Cluster Name Index	4-2
Major Interest Area Cluster Name Index	4-4
Section 5. Program Order Number	5-1
Definition and Codes	5-3
Service Codes	5-5
Appendix A. Processor Groups for Graduated Charges	A-1
Appendix B. Acronyms	B-1
Appendix C. Trademarks	C-1
IBM	C-1
Other Companies	C-3
Appendix D. Agreement for IBM Licensed Programs	D-1
IBM Program License Agreement (Z123-3301-02)	D-11

Highlights of this Edition

- This edition contains a revised cross reference format.
- The Personal Computer, Cooperative Software, Keyword and Software Cluster sections contain Program Order Numbers and Titles only.
- The Program Order Number section (Section 5) has a new expanded format providing general product information.
- Explanation of codes and fields appearing in the Program Order Number Section can be found at the beginning of Section Five.
- IBM software programs that appear with a “+” are new since the last edition. Those that appear with a “-” have been withdrawn from marketing and will not appear in the next directory.
- Brief introductions precede each of the software sections. For general product information, please refer to the Program Order Number section.
- An Acronym Appendix (B) has been added for your reference.
- Prices are current as of May 16, 1989. Software withdrawn from marketing prior to October 1, 1988, is not listed.
- Send comments by completing the Reader Comment Card in the back of the book.
- This edition contains OfficeVision products announced in May, 1989. See “About OfficeVision” on page xv for a general overview.

Software Section Overview

The five software sections appear in sequence as listed below. The Program Order Number and the Product Name are found in the first four sections. The final section, the Program Order Number section, contains software product information in addition to the Program Order Number and the Product Name.

Section 1. Personal Computer Programs (pink pages)

A list of PC Software Program Order Numbers and Titles marketed by IBM. Refer to Section 5 for additional product information.

Section 2. Cooperative Software Programs (blue pages)

IBM is authorized by certain vendors to present sales materials and take orders for their computer programs. Your IBM Marketing Representative will assist you in ordering these products. Program Order Numbers and Titles are listed, refer to Section 5 for additional product information.

Section 3. Keyword (white pages)

This section lists Program Order Numbers and Titles alphabetically by: a general word from the title of the software, a word associated with the title, or an acronym (short word) for the title. Refer to Section 5 for additional product information.

Section 4. Software Clusters (yellow pages)

Program Order Numbers and Titles are grouped into clusters by topics, system, and/or application area. An alphabetic index of cluster names and a major interest area index of cluster names are provided in the beginning of this section. The clusters are intended to overlap, therefore the same program may appear in several cluster lists. Refer to Section 5 for additional product information.

Section 5. Program Order Number (white pages)

This section provides general product information in Program Order Number sequence. Program Order Numbers can be found by referring to Sections 1 through 4.

How to Order

To order or request information use the Order Card in the back. Complete the card using the Program Order Number or the Publication Number where indicated. (The Publication Number follows the "PUBS" code listed in the Program Order Number section). To order by phone call IBM Direct (Continental U.S., Hawaii, Alaska, Puerto Rico) toll free 1-800-IBM-2468 and place your order with the Software Department.

Cooperative Software programs are an exception. Simply contact your IBM Marketing Representative to order these cooperative vendor products.

To subscribe to the Software Directory, indicate the quantity required on the Order Card. IBMers may also use code 1152 for DAPS subscriptions, or the form number GB21-9949 for SLSS.

This edition is available online to IBMers. To request installation of this service, address a note to IBMSOFT at DALHQIC2.

About OfficeVision

Announcing the OfficeVision Family Series -- the first in a new generation of SAA application software designed to support office requirements. The OfficeVision Family brings a new dimension of computer connectivity to the business environment. The OfficeVision Family allows IBM workstations, IBM mid-range and mainframe computers to talk, share data, and use the same applications. OfficeVision provides significant new functions and visibility enhancements.

- A new consistent interface
- Enhanced capability for business applications with office functions
- Integrated packaging for host that includes workstation support
- Wide variety of languages

Connectivity

OfficeVision links computers of all sizes together. Users on intelligent workstations are connected to host systems and can access numerous applications, like electronic mail, address book, calendars, and more, using a common user interface. This will be discussed in a later section. The OfficeVision Family's capability to tie workstation users together within the same corporate network allows users to share access to the same data and applications. Users don't even have to know where data is stored in order to retrieve it! This compatibility between applications makes the OfficeVision Family easy to use, yet powerful and productive for the individual, as well as for the entire business environment.

Productivity

While the OfficeVision Family offers the superior ability to mix and share data between programs, it is also easy to learn. Easy because of a consistent, intuitive, iconic interface, the Common User Access (CUA).

Common User Access (CUA) Capabilities

- Offers a set of rules consistent between applications for the entire OfficeVision Family
- Uses windows, icons and a mouse to quickly navigate between tasks
- Allows several activities -- from electronic mail to spreadsheets -- to be performed at the same time (similar to the way work often happens)
- Has extensive contextual help available online that is accessible whenever needed

And all CUA applications are defined the same way. As a result, users do not have to learn different ways to interact with each application. For example, to look at and print a note from the mailbasket, use the same steps to look at and print a spreadsheet or an accounts receivable statement.

Functions

Depending on the version, the OfficeVision Family includes :

Mail	Address Book
Calendar	Decision Support
Telephone	Application Integration
Online Help and Tutorials	Editor Capability
Relational Library	Workstation Support

Plus a variety of optional features. A myriad of languages are also available in the OfficeVision Family.

Flexibility

The OfficeVision Family supports a variety of configurations. You can configure the OfficeVision Family across the full range of Systems Application Architecture (SAA) systems.

- System/370 mid-range and large systems
 - Virtual Machine/System Product (VM/SP)
 - Virtual Machine/Extended Architecture (VM/XA)
 - Multiple Virtual Storage/Enterprise Systems Architecture (MVS/ESA)

-
- Application System/400 (AS/400) mid-range systems
 - OS/2 Extended Edition

And the OfficeVision Family allows adjustment as needs change. The purpose of the OfficeVision family is to allow the business environment to select configurations that best support their specific organizational needs. While ensuring compatible services to all users connected in the same corporate network. OfficeVision utilizes the OS/2 operating system and Operating System/2, Extended Edition 1.2. Installation and support services are provided for the OfficeVision Family Series. For more information, please complete the Order Card in the back of this directory.

Section 1. Personal Computer

Personal Computer

An alphabetic listing of programs bearing the IBM logo follows on Page 1-3. Most are orderable from your IBM Branch Office or are carried by IBM authorized dealers.

Most programs listed in this section bearing the IBM logo are offered under the terms and conditions of the IBM Program License Agreement included in each program package. This Agreement states that programs are provided "as is" without warranty of any kind, express or implied except that program diskettes are warranted to be free from defects in material and workmanship for a period of ninety days from date of delivery. IBM

may discontinue offering programs covered by this Agreement at any time.

Other licensed programs listed in this section that are PC related may be offered under the terms and conditions of the Agreement for IBM Licensed Programs (Z125-3358). For information regarding these programs contact your IBM Branch Office.

See Appendix D for highlights and a general overview of the Agreement for IBM Licensed Programs (Z125-3358). The IBM Program License Agreement (Z123-3301) for Personal Computer licensed programs and selected other licensed programs is printed in its entirety.

Section 2. Cooperative Software

Cooperative Software

IBM markets selected software application programs, published by non-IBM sources, as Cooperative Software Programs. IBM will present the Cooperative Software Program supplier's sales materials, offer and represent the program, and take orders for it.

The Cooperative Software Program supplier is responsible for licensing, terms and conditions, prices, distribution, billing the customer, and accounts receivable. Either the Cooperative Software Program supplier or the customer is responsible for installation, customer education, and

support and maintenance, depending upon the agreement between them.

The Cooperative Software Program supplier, or his IBM-approved agents may assist IBM in marketing the program and may participate in joint sales calls.

To order these non-IBM programs or for additional information contact your IBM Branch Office.

Cooperative Software Programs are not IBM licensed programs, and IBM makes no warranties with respect to them.

Cooperative Software (Terms and Conditions).

Prices: The prices listed for Cooperative Software Programs are for reference only and are as provided from the supplier's current price list. Current prices and quantity discounts, if any, can only be obtained from the program supplier's marketing package. Program charges are subject to change without notice.

Program Validation: The features and functions of Cooperative Software Programs have only been validated through a random telephone survey of the program supplier's installed customers.

Technical Assistance: Technical assistance, installation and usage support are as provided by the program supplier. The program supplier and/or the customer may be responsible for installation depending upon the agreement between them.

Test Period: The test period, if any, is as provided by the program supplier.

Licensing: The Cooperative Software Programs are available from IBM as distributed by the program supplier. The terms and conditions are provided by the program supplier. IBM makes no warranties, express or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose. Address any questions pertaining to warranty coverage to the program supplier.

Warranted: Not warranted by IBM. Warranty, if any, is as provided by the program supplier.

Quantity Discount: IBM Quantity Discount Agreements are not applicable to Cooperative Software Programs. Quantity discounts, if any, are as provided by the program supplier.

Educational Allowance: IBM Educational Allowances are not applicable to Cooperative Software Programs. Allowances, if any, are as provided by the program supplier.

Section 3. KEYWORD

Section 3. KEYWORD

Keyword

This section lists Program Order Numbers and Title alphabetically by keyword. A general word from the program title, a word that is associated with the title, or an acronym (short name) may all be used as keywords. To locate the Program Order Number, simply scan the keyword columns

of the page. Programs with the same keyword are grouped together in Program Order Number sequence. Programs may appear under more than one keyword. For general product information refer to Section Five.

Software Clusters

The following section groups all software into clusters by topic, system and/or application area. Refer to the alphabetic cluster name index and the major interest area index that precede this section to locate page numbers. The clusters will overlap, therefore the same program may appear in more than one cluster list.

Alphabetic Cluster Name Index

Cluster Name	Page	Cluster Name	Page
Academic Information Systems	4-7	Education	4-30
AIX Family Definition	4-8	Engineering and Scientific	4-34

Section 5. PROGRAM ORDER NUMBER

Section 5. PROGRAM ORDER NUMBER

Program Order Number

This section lists product offerings in Program Order Number sequence. Cross reference Sections 1 through 4 to find the Program Order Number.

Notes

- Prices are current as of May 16, 1989.
- Software withdrawn from marketing prior to 10/1/88 is not listed.
- Charges, terms and other characteristics are for information purposes only and subject to change.
- IBM Licensed Programs are available under the Agreement for IBM Licensed Programs (Z125-3358).
- Applicable taxes will be added to the charges.

All information is subject to confirmation at the time of granting the license. Contact your IBM Marketing Representative for additional information. Refer to Appendix D for a general overview of the Agreement for IBM Licensed Programs.

Definitions and Codes

The Program Order Number section has a revised format. The new format is intended to provide general product information in an easier-to-read manner. Following is an explanation of the fields as they appear in the listing.

Program Order Number: A typical Program Order Number will look like 5750-AFB. This entire section is in Program Order Number sequence.

Title: Program or feature title including version and release shown as VxRx where: V = Version, R = Release, x = any number indicating version or release level.

The title may be preceded by a "+" or a "-" where:

- + Program or release new since 10/1/88
- Program or release withdrawn from marketing after 10/1/88

Acronym: Short name or acronym for the program. For program numbers starting with 5799, the RPQ number will appear, if required.

Available Date: The latest announced availability date for this release or feature.

Pricing Indicator: When present, shows the following prices are either "Processor Based Charges" or "Incremental Tier Charges".

Prices: Each price shown will be preceded by a price code. The format for the price code is X/Y where:

X = License Type, values are: Y = Charge Type, values are:

B = Basic License	0 = One Time Charge
D = DSLO License	M = Monthly Charge
S = Single License Option	I = Initial Charge
M = Multiple License Option	A = Annual Charge
	P = Primary Charge

Processor Based Charges: Processor Based Charges are graduated according to Processor Group. The number for each applicable Processor Group will appear before its associated prices. Refer to Appendix A for a listing of Processor Groups.

Incremental Tier Charges: The number for each tier will appear before its associated price increments. In order to find the price for any given tier, add all price increments from lower tiers. Some increments may be zero.

			<u>Sample price calculation:</u>
Tier 1	B/0	150	Tier 1 = 150
2	B/0	0	Tier 2 = 150 + 0 = 150
2*	B/0	25	Tier 2.5 = 150 + 0 + 25 = 175
3	B/0	0	Tier 3 = 150 + 0 + 25 + 0 = 175
4	B/0	50	Tier 4 = 150 + 0 + 25 + 0 + 50 = 225

* If the tier number appears as "2*" the actual tier number is "2.5".

No Charge: If there is no charge for a program or feature, "nc" will appear on the price line.

Variable Prices: If the prices vary for a program or feature, the word "varies" will appear on the price line. Contact your IBM Marketing Representative for prices.

Service Code: The following are codes for the Service Class. Specifics should be obtained from your IBM Marketing Representative.

- A** Central and local Programming Services are provided.
- B** Central Programming Service and local Systems Engineering assistance is provided.
- C** Central Programming Service is not provided.
- D** Central Programming Service and local Systems Engineering Programming Service is provided.
- E** Central Service is available from the IBM Support structure or other source as designated in the Programming Announcement or Availability Notice.
- F** Central Service for one year after receipt, but not later than the expiration date stated in the Program Announcement or Availability Notice.
- G** Central Service for ninety days after receipt, but not later than the expiration date stated in the Program Announcement or Availability Notice. Licensee must return the Service Registration card to qualify.
- H** Central Service is available until the date shown in the Availability Notice or Program Announcement.
- I** Central Service is available at a fee until the expiration stated in the Availability Notice or Program Announcement. The fee is waived during a specified installation period.
- J** Class 1 System Control Programming. Central Service including the IBM Support Center. Local Program Support for an IBM processor is available under separate agreement (Z120-3829) from National Service Division with monthly charges based on the model of the processor, or at the applicable hourly rate.
- K** Central Service including the IBM Support Center. Local Licensed Program Support is available under Agreement (Z120-3821). Not offered after 1986.
- L** Central Service, including the IBM Support Center. Local Licensed Program Support on a per call basis only.

- M** Central Service, including the IBM Support Center.
- Q** Central Service provided through the host product, i.e., not on the XT or AT/370.
- S** Class 2 System Control Programming. Central and Local Service available while the SCP remains current.
- W** Cooperative Software. Either the vendor or the customer is responsible for installation, customer education, support and maintenance depending on the agreement between them.
- X** Central Service has expired.
- Y** These programs are distributed by IBM but the IBM logo does not accompany the product. Description of service normally is provided by the licensor.
- Z** These Personal Computer programs are licensed and supported under individual terms and conditions included with the package.

Service End Date: This information will appear only if a Service End Date has been announced.

Test Period: Most programs have a test period of one or two months as indicated. "Y" indicates a test period of five days.

License: Following is a list of codes and their associated license types. Refer to Appendix D for an explanation of each license type.

S = Separate License	E = Courseware License
L = Location License	U = Usage License
I = Installation License	

Publications: "Pubs" will appear when additional information is available on a Program. The Order Number for that information will appear and may be used on the Order Card in the back of the Book.

Environment: Describes the general environment for the program.

Group H5	9406	B50
Group J5	9406	B60
Group K5	9406	B70

Table A-5. Processor Groups for Graduated Charges

NOTES:

- Processor Groups listed are current as of June, 1989.
- If a Program with Graduated Charges is licensed for use on an IBM machine not listed in a current Exhibit, the Charges will be those for the Group with the highest Charges.
- Licensed Programs that are available with Graduated Charges are identified in the Program Order Number section with the phrase "Processor Based Charges" appearing on the right hand side of the base line information.
- Over time, at IBM's discretion, these Processor Groups may be redefined to keep in line with processor performance and technological advances.

Appendix B. Acronyms

Acronym	Meaning
ACF	Advanced Communication Function
ACF/NCP	Advanced Communication Function/Network Control Program
ACF/SSP	Advanced Communication Function/System Support Program
ACO	Automated Console Operations
AD	Application Development
ADPS/M	Application Development Project Support/Application Development Model
AE	Application Execution
AEC	Architecture, Engineering, Con- struction
AFMT	Advanced Function Management Tools
APF	Application Preparation Feature
APPC	Advanced Program-to-Program Communications
AS	Application System
CAD/CAM	Computer Aided Design/Computer Aided Manufacturing
CDR	Call Detail Records
CEDS	COPICS Engineering Data Support
CIEDS	Computer Integrated Electrical Design
CIEDS/CBDS	Computer Integrated Electrical Design/Circuit Board Design System
CIM	Computer Integrated Manufacturing
CIMS	Comprehension Information Man- agement for Schools
CMAS	Construction Management and Accounting System
CMS	Conversational Monitor System
CPCS	Check Processing Control System
CPM	Critical Path Method
CSAS	Career School Accounting System
CSP	Cross System Product
DCE	Data Circuit-terminating Equipment
DDF	Distributed Data Facility
DFSORT	Data Facility Sort
DISPF	Decision and Information Support Productivity Facility

Acronym	Meaning
DITTO	Data Interfile, Transfer, Testing and Operations
DM	Distribution Manager
DMAS	Distributors Management Accounting System
DPPX	Distributed Processing Programming Executive
DSNL/2	Direct S.W.I.F.T. Network Link/2
DSLO	Distributed System License Option
DTE	Data Terminal Equipment
DTL	Dialog Tag Language
ECF	Enhanced Connectivity Facility
EDX	Event Driven Executive
EMCS	Enterprise Management Control Series
EMS	Event Manager Subsystem
EP	Emulation Program
ESA	Enterprise Systems Architecture
ESSL	Engineering & Scientific Subroutine Library
FTAM	File Transfer Access & Management
FTPS	Financial Transaction Processing System
GAM/SP	Graphics Access Method/System Product

NOTE: The preceding should not be construed as a comprehensive list of trademarks.

Appendix D. Agreement for IBM Licensed Programs

General Overview:

This overview summarizes and presents the key provisions of the Agreement for IBM Licensed Programs (Z125-3358-01) in general terms. It is intended for information purposes only. All questions regarding specific terms and conditions should be directed to your IBM representative or your local IBM branch office.

The Agreement for IBM Licensed Programs is a license agreement and not an agreement for sale. IBM retains title to the copy of the Program and any copies made from it.

Programs become subject to the terms of this Agreement when IBM accepts an order by providing the customer with a Supplement to this Agreement or other IBM-designated documentation. Upon the customer's receipt of the Supplement, IBM grants a nontransferable and nonexclusive license in the United States and Puerto Rico. The Program may not be transferred without IBM's written consent.

IBM will specify supplemental terms in a Supplement and in either the Licensed Program Specifications or the notice of availability. Initial use of the Program or initial payment constitutes acceptance of the terms by the customer.

For variable charge Programs, IBM provides Exhibits which list either IBM or non-IBM machines by group. IBM will specify, in a Supplement, the applicable group as a feature of such Programs. From time to time, IBM may revise Exhibits, modifying any information or terms and conditions in the Exhibit.

DEFINITIONS: The term "Program" means instructions or statements in machine readable form, any data base in machine readable form, and/or any related materials, including documentation and listings whether in machine readable or printed form. Programs are copyrighted.

"Restricted materials" are those portions of a Program which are labeled "Restricted Materials of IBM".

“Use”, relating to a Program, means copying any portion of the Program into a machine and/or transmitting it to a machine for processing.

“Designated Machine” means the machine, specified in a Supplement, on which the Program is used for processing.

“Group” means the machine group of the Designated Machine.

“Variable charge Programs” means those Programs whose charges are based on the group of the Designated Machine and include graduated charges, processor-based charges and other charges designated by IBM.

LICENSE: The customer is authorized to use the machine readable portion of the Program on the Designated Machine and to store, transmit through, and display it on associated machines. Customers may also use the printed portion of the Program and/or copy or translate the machine readable portion into any machine readable or printed form in sufficient copies to support authorized use of the Program.

The customer may not copy Programs provided by IBM in printed form, microfiche or other non-machine readable form. Additional copies of the Program may be licensed at applicable charges.

A separate license is required for each machine on which the Program is used, unless otherwise specified.

The customer may not reverse assemble or reverse compile Programs.

A subsequent Program release will be made available to the customer for use on a Designated Machine while a previous release is still in productive use on that Machine. However, Program services may not be available for previous releases. A subsequent Program release has the same number as the previous release.

Customer authorization for use of restricted materials is limited to making modifications to the Programs containing restricted materials and/or the customer's products/programs so they will function with the Programs containing restricted materials. Authorization is extended for assistance in problem determination, problem source identification or problem resolution activities associated with the use

of Programs containing restricted materials. The customer must also comply with the provisions of the *Permission to Modify* Section.

These provisions also apply to restricted materials distributed for an IBM Education Course.

Temporary License Transfer: A Program can be temporarily transferred to a backup machine if the Designated Machine is inoperable or cannot assemble or compile the Program.

Installation License: An Installation License is a designation specified for certain Programs, that allows those Programs to be used on any other machine in the same installation as the Designated Machine. "Same installation" means a single room or contiguous rooms.

Location License: A Location License is a designation specified for certain Programs, that allows those Programs to be used on any other machine in the same location as the Designated Machine. "Same location" means a single building designated by a single mailing address.

Usage License: A Usage License is a usage restriction for selected Programs. A separate license or additional feature is required for use of the Program which exceeds the usage restriction.

Change in Designated Machine: IBM will confirm the effective date of a change in Designated Machine upon receipt of notification from the customer.

For variable charge Programs, a change in Designated Machine may result in a change in the applicable group. Variable charges associated with the new group are effective on the date the Designated Machine is changed. IBM will notify the customer of the effective date of the new charges.

Machine Upgrades and Downgrades: For variable charge Programs, installation of an upgrade or downgrade to the Designated Machine may result in a change in the applicable group. The variable charges associated with the new group will be effective when the machine upgrade or downgrade is installed. Upon written request from IBM,

the customer will certify in writing that the Designated Machine groups are accurate.

Group Reassignment: For variable charge Programs, any reassignment by IBM of a Designated Machine in a revised Exhibit may result in the existing applicable licenses being reassigned to a new group. Charges will be levied according to the new group.

Additional Licenses: Upon receipt of a Supplement specifying the Effective Date for Additional License, the customer may copy the machine readable portion of the Program previously distributed from IBM in lieu of another shipment. Any testing period for the Additional License begins on the Effective Date for Additional License.

Distributed Systems License Option (DSLO): For Programs offered with a DSLO, the customer may obtain a license in addition to the initial license (Basic License) for a DSLO charge. Under the DSLO, the customer will:

- Copy the machine readable portion of the Program and use the copy on a DSLO Designated Machine.
- Provide problem documentation to IBM from the Basic License's location.
- Distribute to, install and test on the DSLO Designated Machine any new release, correction, or bypass provided by IBM to the Basic License Designated Machine.
- Receive Program services and warranty, if any, only through the Basic License location.

There will be no testing period for DSLO licenses.

The customer must designate a new Basic License as a replacement for a discontinued Basic License.

Discontinuance of Licenses: The customer may discontinue a license upon one month's written notice, except during the testing period, when the license may be discontinued immediately with written notice from the customer.

IBM may discontinue any license upon written notice effective immediately if the customer fails to comply with the terms and conditions of this Agreement.

CHARGES: Charges for Programs may fall into one of the following: initial, periodic, one-time, process, or upgrade.

For certain Programs, IBM may designate one or more replacement Programs. When a discontinued Program is replaced, upgrade charges may apply to the replacement Program. When IBM specifies, the replacement Program may be obtained prior to replacement of the discontinued Program.

For variable charge Programs, the customer will pay charges based on the applicable group. If a variable charge Program is licensed for use on a Designated Machine not listed in an Exhibit, the charges for the group with the highest charges apply.

Commencement and Invoicing of Charges: Periodic charges will be invoiced in advance and commence on the day, Monday through Friday, following the end of the testing period, or ten days after shipment. Monthly charges will be prorated, based on a 30 day month. Other periodic charges are not prorated and are not refundable.

One-time charges, initial charges and upgrade charges will be due on the day, Monday through Friday, following the end of the testing period, or 10 days after shipment, if there is no testing period.

For an Additional Copy with no testing period, periodic charges will commence and other charges will be due on the Effective Date for Additional License.

Process charges are due when invoiced and are not refundable.

Payment will be made as stated in the invoice.

Applicable Taxes: The customer agrees to pay any taxes resulting from this Agreement, except taxes based on IBM's net income.

Price Changes: Periodic charges are subject to change with three months' prior written notice.

One-time, process, upgrade, or initial charges are subject to change upon notice, effective immediately. An increase will not apply if IBM shipped the Program or the customer made an Additional Copy before the date of the notice. If a written order is received before the announcement, the increase will not apply if, within one month of the date of notice, IBM ships the Program, the customer makes an Additional Copy or a group upgrade occurs for a variable charge Program.

SHIPMENT: IBM will specify the estimated shipment date of each Program. Either party may change it as necessary.

EARLY SHIPMENT OF PRINTED MATERIALS: Upon customer request, following the Program's general availability, IBM will ship the Program's printed portion up to six months before shipping its machine readable portion.

PROGRAM TESTING: IBM will specify a testing period, if any, during which the Program will be available for nonproductive use to determine if the Program meets customer requirements. The testing period will begin on the day following 10 days after shipment or the Effective Date for Additional License.

If the Program is discontinued during the testing period, charges, other than process charges, will not be due.

The customer is required to notify IBM if the Program is used for productive purposes during the testing period. The testing period will end as of the date productive use began.

RISK OF LOSS: IBM assumes risk of loss or damage during shipment. Program material lost while in the possession of the customer will be replaced at the applicable charges, if any, for processing, distribution and/or storage media.

MACHINE READABLE DOCUMENTATION: IBM may make available machine readable documentation which may include IBM-designated "L", "G" and "S" manuals. IBM may provide such documentation as a feature for a Program. The customer may use, copy and modify such documentation as IBM specifies.

PROGRAM SERVICES: IBM will specify the Program services, if any, which IBM will provide without additional charge for a current release of a Program. Program services will be available after shipment of the Program or on the Effective Date for Additional License.

When IBM specifies Central Service, IBM will designate one or more service locations which will accept documentation indicating that a defect in the Program is causing a problem. Central Service will respond to a defect in an unaltered current release of the Program by issuing information which corrects the defect, corrected documentation or code, or a restriction or bypass.

Central Service will respond only to defects which occur when Central Service operates the Program in a Specified Operating Environment.

IBM may also establish a Support Center to provide the customer with telephone assistance.

For each version of a Program, IBM will specify that Program service, if any, will be available until discontinued by IBM upon six months' written notice, until a designated date or for a designated number of months.

When a subsequent Program release becomes available, IBM may discontinue Program services for any or all previous releases. IBM does not guarantee service results or that IBM will correct all Program defects.

PERMISSION TO MODIFY: Customers may modify the machine readable portion of the Program and/or merge it with other programs for their own use. Any portion of the Program included in the updated work is subject to this Agreement. Upon discontinuance of the license for the Program, the Program must be completely removed from the updated work.

PROTECTION AND SECURITY: In order to satisfy the obligations under this Agreement the customer will:

- Take appropriate action by instruction, agreement or otherwise, with any persons permitted access to any Program.
- Not distribute any Programs to any other persons, including other licensees, without IBM's written consent.

-
- Reproduce and include the copyright notice(s) and other legend(s) on any copies of the Program made by the customer following IBM's copyright instructions.
 - Maintain records of the number and location of all copies of the Program. IBM must be notified in writing if the original or any copy of the Program will be kept at premises other than that of the Designate Machine.
 - Insure, before disposing of any media, that any Program contained on it has been erased or destroyed.

The customer may make the Program available to their employees, IBM employees or other persons either during the period they are on the customer premises or authorized for remote access. The Program may not be made available in any form to any other persons without IBM's written consent.

Only the customer may access any Program data base. The customer may not make any data in the data base available to any other person.

LICENSED PROGRAM SPECIFICATIONS: For each warranted Program, IBM will provide a document, "Licensed Program Specifications", which may be updated occasionally.

Each Program is designed to operate on one or more IBM machine types and with other IBM equipment and programs. The Specified Operating Environment is stated in the Licensed Program Specifications for warranted Programs and in the Program's availability notice for "AS IS" Programs.

WARRANTY: IBM warrants that each Program specified by IBM as warranted, when shipped to the customer, will conform to its Licensed Program Specifications, if properly used in a Specified Operating Environment.

The customer may notify IBM during the period Program services are available if the customer believes the Program does not meet its Specifications.

IBM does not warrant that the functions contained in a Program will meet the customer's requirements or will operate in the combinations

which may be selected for use or that the operation of the Program will be uninterrupted or error free.

RETURN OR DESTRUCTION OF PROGRAMS: Within one month after the date of discontinuance of any Program, the Agreement requires the return or destruction of all applicable copies of the Program. A copy may be retained for archival purposes with IBM's written authorization.

When licensing a new version of the Program with a different Program number, the customer may retain the previous version without charge for up to three months after the date of discontinuance. The customer may use the previous version only if a defect in the new version prevents its use.

The requirement to return or destroy also applies to a Program which is a data base. However, this does not apply to individual pieces of data obtained from the data base.

After the discontinuance and upon IBM's written request, the customer will certify full compliance with these terms.

PATENTS AND COPYRIGHTS: IBM will, at its expense, defend the customer against a claim that any Program furnished under this Agreement infringes on a patent or copyright in the United States or Puerto Rico. IBM will also pay all costs, damages, and attorney's fees awarded as a result of the claim. In order to qualify for such defense and payment, the customer must promptly notify IBM in writing and allow IBM to control, and fully cooperate with IBM in, the defense and all related settlement negotiations.

IBM may, at its option and expense, either secure the right to continue using the Program, or replace or modify it so that it becomes noninfringing. If neither of the foregoing alternatives is reasonably available, the customer will return the Program upon IBM's written request.

IBM shall have no obligation with respect to any claim based upon customer modification of a Program, or its combination, operation or use with apparatus, data or programs not furnished by IBM, or its use in other than the Specified Operating Environment.

LIMITATION OF REMEDIES: In all situations involving performance or non-performance of warranted Programs, IBM will attempt to make the Program operate as warranted. If, after repeated efforts, IBM does not provide such a remedy, the customer shall be entitled to recover actual damages to the limits set forth in the *Limitation of Remedies* Section of the Agreement for Licensed Programs.

GENERAL: The customer may not assign this Agreement or sublicense any license.

The customer accepts the responsibility for selection, installation, use and results obtained from the use of the Programs.

The customer may terminate this Agreement upon one month's written notice only when all licenses are discontinued and all Programs have been returned or destroyed.

This Agreement may be terminated by either party for failure to comply with the terms and conditions.

IBM may modify the terms of this Agreement upon three months' written notice.

If there is a conflict between this Agreement and its Exhibit, the terms and conditions of the Exhibit shall prevail.

IBM Program License Agreement (Z123-3301-02)

Personal Computer licensed programs and selected other licensed programs are licensed under the terms of the IBM Program License Agreement, which is an unsigned agreement that accompanies the licensed program when it is distributed from IBM.

MAJOR PROVISIONS OF THE PROGRAM LICENSE AGREEMENT: The customer may use the program on only one machine at a time and may transfer the program to another party if the other party agrees to accept IBM's terms and conditions. If transferred to another party, the first party's license terminates. The customer may not reverse assemble or reverse compile or make copies for purposes other than modification or backup, and may not sublicense, rent or lease the program.

TERM: The license is effective until terminated by destruction of all copies, transfer of all copies to another party with the Agreement, or failure of the customer to comply with any of the terms and conditions.

LIMITED WARRANTY AND DISCLAIMER OF WARRANTY: Programs will either be designated as warranted in the program specifications or shipped "as is". For those programs which are warranted, the program will conform to the program specifications when properly used on the machine for which it was designed. The media on which the program is furnished is warranted for 90 days from the date of delivery to the customer.

LIMITATION OF REMEDIES: For defective media, IBM will replace the media during the warranty period, or refund the cost of the program if replacement media cannot be delivered. The limits of IBM's liability are the greater of \$5,000 or the cost of the program.

SERVICE: Service, if any, will be specified in the program specifications.

YOU SHOULD CAREFULLY READ THE TERMS AND CONDITIONS OF THE IBM PROGRAM LICENSE AGREEMENT BEFORE OPENING THE PROGRAM PACKAGE. OPENING THE PROGRAM PACKAGE INDICATES YOUR ACCEPTANCE OF THESE TERMS AND CONDITIONS. IF YOU DO NOT AGREE WITH THEM, YOU SHOULD PROMPTLY RETURN THE PACKAGE UNOPENED, AND YOUR MONEY WILL BE REFUNDED.
