C.C.E.D. OPERATING PROCEDURES

Customer Set Up

- Minimum of 8K available in P1
- EJ Halt displayed in P1
- Device to be tested must not be assigned to a customer's program or program level.

Running Procedure

- Set Dual Program Select Switch to Program 1 P-KB
- Depress the INTERRUPT key
- When the 5471 PROCEED light comes on, enter the following OCL statements:

```
//NAME JOB SPOOL-NO
// LOAD $CEOLD,XX
// RUN
```

NOTE 1: If only the disk ERAP printout is desired, substitute \$CEFF7 for \$CEOLD in the load statement.

NOTE 2: XX is the simulation area on the 3340 which contains the C.E. diagnostic programs.
 XX = F1, R1, F2, or R2.

All C.C.E.D. halts are indicated by 'cE' in the P1 stick lights accompanied by a printed Halt ID and/or a message on the 5471. (See Diagnostic User's Guide MDM Vol. 1A for Halt ID references.) For all other stick light halts, refer to the customers' halt guide.

To Respond To The 'cE' Halt

- Depress P1 HALT RESET
- Enter the desired response to the prompting message
- Depress the END key

To Terminate, Enter The Following

- EE - To terminate the device test
- EJ - To terminate C.C.E.D.
- Depress the END key

The test programs and routines supported are identified by three digits as indicated below.

- 512 - 1442 Function Test
 - 001 - Variable length punch
 - 002 - Card image read
 - 003 - Ripple punch
 - 004 - Ripple read
 - 005 - Stacker select
- 515 - 1442 Read Evaluation and Adjustment Test
- C1B - 3340 Data Module Scan Test
- E01 - 5203 Printer Function Test
 - 007 - Start I/O commands
 - 008 - Carriage space-skip
 - 009 - H & T print quality
 - 00A - Paper settling
 - 00B - Worse case print
 - 00C - Ripple print pattern
 - 00D - Unprintable character
- E03 - 5203 Chain Character Counter Test (48 Character)
- E06 - 5203 Chain Emitter Timing Test (48 Character)
- E12 - 1403 Printer Function Test
 - 006 - Unprintable character
 - 007 - Start I/O commands
 - 008 - Carriage space-skip
 - 009 - H & T print quality
 - 00A - Paper settling
 - 00B - Worse case print
 - 00C - Ripple print pattern
- E13 - 1403 Chain Character Counter Test (48 Character)
- E14 - 1403 Chain Emitter Timing Test (48 Character)
- E15 - 1403 Carriage Function Test
 - 001 - Carriage timing analysis
 - 004 - Carriage emitters
- E18 - 1403 Printer Carriage Single Shots Check
- F01 - 5424 MFCU Function Test
 - 004 - Commands
 - 005 - Stacker select
- F02 - 5424 MFCU Function Test
 - 001 - Ripple punch
 - 002 - Ripple read
 - 003 - Ripple print
 - 004 - Print H in all positions
 - 005 - Print - in all positions
 - 006 - Print 1 in all positions
 - 007 - Print character entered via printer keyboard.
 - 008 - Print characters entered via printer keyboard.
 - 009 - Print characters entered by a data card
- F03 - 5424 MFCU Read Evaluation and Adjustment Test
- FF7 - 3340 ERAP
