Acknowledgments

Please remember that although you own this disc, you do not own all of the programs and fonts recorded on it. Many fonts and programs on this disc are shareware. You are free to try each program for a limited time. If you are satisfied and want to continue to use the program, you should register it by sending a specified amount of money directly to the author of the program. Often the author will send you the most up-to-date version of the program and a printed manual. Please check the individual files for specific information.

Also note that the font names used by the authors of the fonts on this disc may sometimes be similar to certain commercial (not public domain or shareware) fonts. Please be aware that the fonts on this disc may differ considerably from these commercial versions.

How to Use this CDROM and book

To use this book:

This book is a reference guide to the Font Garden™ CDROM. It displays the basic characters of each font found on the disc. Most of the fonts on this disc come in files compatible with Windows and Macintosh, in both Type 1 PostScript and TrueType formats. Organized in alphabetical order, the name of each font appears above the character display. To find where the font files are located on the disc, simply look in the subdirectories on the CDROM labeled “Mac TrueType Font” and “Mac Type 1 Fonts” for fonts in Macintosh format, or “TTF” and “Type 1” for fonts in Windows format. For Windows users, the corresponding file name of each font format is also listed directly underneath the character display on each page.

Font Installation

Installing Fonts with a Macintosh:

The fonts for use under a Macintosh system are located in two folders, “Mac TrueType Fonts” and “Mac Type 1 Fonts.” To install any of the fonts therein, simply drag the font to your System Folder.

MSDOS Quick Start:

To use this disc with the MSDOS prompt, first change drives to your CDROM drive. Then type *View* in the root directory of the CDROM drive and press *Enter*.

Example: C: \> D:
D: \> *View*

The *View* program will display a listing of the CDROM's

subdirectories and their descriptions. Use the cursor (arrow) keys to move the highlight bar up and down the screen. After highlighting the desired subdirectory, press **Enter** to change to that subdirectory. The **View** program will then display a list of files within that particular subdirectory. To view or run any of these files, use the cursor (arrow) keys to highlight the desired file and press **Enter**. To copy a particular file, press the **C** key. To return to the subdirectory listing, press the **Escape** key. Pressing **?** will display a help screen.

Please consult \DOCS\VIEW.DOC for a complete explanation on all of the features of the **View** program.

Installing the FONTVIEW.EXE program for Windows:

The FONTVIEW.EXE program allows you to easily view and add the TrueType fonts from the CDROM into your Windows setup. To install the FONTVIEW.EXE program:

1. Start up Windows.
2. From the Windows Program Manager, choose **Run** from the File menu.
3. In the dialog box, type **D:\Setup**. (If the D: drive is not your CDROM drive, change it to the appropriate CDROM drive letter.)

This will create a program group for this disc, as well as icons for the programs that can be run directly from the CDROM.

Manually installing TrueType Fonts into Windows:

1. While at the MSDOS prompt, change to your CDROM drive and type **View** in the root directory of the CDROM drive, then press **Enter**.

Example: C: \> D:

D: \> **View**

If your CDROM drive is not the D: drive, substitute your CDROM drive letter for D:.

2. Within the **View** program, use the cursor (arrow) keys to move the highlight bar up and down. Choose the TrueType Fonts directory, and press **Enter**.
3. Select which category you wish to view by moving the highlight bar up and down, and then pressing **Enter**. You may go back to the previous menu by pressing the **Escape** key.
4. While in the TrueType fonts categories, use the highlight bar to choose a font. Press **Enter** to copy the font onto your hard drive.
5. At the Destination prompt, type the location of your Windows System Directory. On non-customized systems, this would normally be **C:\WINDOWS\SYSTEM**. This will copy the highlighted TrueType font into your Windows System Directory.
6. Install as many fonts as you would like this way, then press the **Escape** key until you exit back to the MSDOS prompt.
7. Start up Windows, if you are not already using it.
8. In the Control Panel window (usually located within the Main program group), choose the **Fonts** icon. The Fonts dialog box appears.
9. Choose the **Add** button.
10. Open the Drives list, and then select the drive that contains your Windows directory, for example **C:\Windows**. In the Directories box select the Windows directory, then select the System Directory to which the fonts were copied earlier in

Step 5.

11. From the List of Fonts box, select the fonts you want to add by clicking on it once. You can extend the selection to add several fonts at once. Or, to add every font in the list, choose the **Select All** button.
12. Choose the **OK** button.

For more information on using TrueType fonts with Windows, please consult your Microsoft Windows User's Guide.

To Remove TrueType Fonts from Windows:

1. In the Control Panel window (usually located within the Main program group), choose the **Fonts** icon. The Fonts dialog box appears.
2. From the Installed Fonts list, select the font you want to remove by clicking on it once. Then choose the **Remove** button. The Remove Font window will appear.
3. If you want to delete the font files from your disk in addition to removing the fonts from memory, select the Delete Font File From Disc check box. Then choose the **Yes** button. Or, if you are removing several fonts at once, choose the **Yes To All** button.

Using Type 1 PostScript Fonts under Windows:

Windows does not natively support PostScript fonts. The commercial product Adobe Type Manager will allow you to use PostScript fonts under Windows. You can purchase Adobe Type Manager separately.

Font Garden™

- Professional Quality Fonts — All fonts formatted for both TrueType and Type 1 PostScript. There are no weeds here — we tested each font and they all RIP.
- Easy-to-use in Window and on Macs — Preview and install fonts in Windows with the user friendly FontView program. On the Mac, simply drag the font to your desktop to install.

The screenshot shows the FontView application window. At the top, there are two dropdown menus for font selection. Below them is a large sample text field displaying the alphabet in two rows. Underneath the text field are several control buttons and checkboxes for font styles. At the bottom, there are buttons for viewing font information, printing samples, and installing the font.

TrueType category selection

TrueType font selection

Sample Text Field (this field is editable)

Changes font size of Sample Text Field

Toggles Bold/Italic/Underline/Strikeout property of Sample Text Field

Shows associated text file of current font (if available). Shareware requires separate payment to author if useful.

Print font samples

Install current font into Windows

Shows CDROM documentation

Displays the Alphabet, Numerals, Sample Text, Symbols, and special fonts in the Sample Text Field

- Examine this book and decide for yourself — you'll love what these hand-picked fonts from the Font Garden do for your designs!
