

# Wireless Communications

FMI's telecommunications IC product offering includes a wide range of advanced Radio Frequency (RF) devices. These products are used in diverse wireless applications such as cellular and cordless telephones, wireless LAN/WAN systems and wireless PBX systems.

## Introduction and Quick Selection Guide

### RF Devices

- Prescalers
- CMOS Phase-Locked Loops (PLLs)
- Super PLLs (Single Chip PLLs/Prescalers)
- Super Analog RF Devices
- BiCMOS LSI RF Integrated Circuits
- Piezoelectric Devices/SAW Filters

### Baseband Devices

- Audio Filters for Cordless Telephones
- LSI's for Cellular Phones
